**Ebyokuddamu biwandiike mu mpapula ezikuweereddwa.**

## **.EKITUNDU A**

1. Kitwale nti gyebuvuddeko Katono, Minisitule y’bavubuka n’ekikula ky’abantu yakuwa omulimu gw’okunoonyereza ku nsonga eziviiriddeko abavubuka okukozesa ebiragalalagala mu kitundu ky’e Bombo mu ssaza ly’e Bulemeezi, era nga wagukola n’abantu abalala babiri.

*Wandiika obubaka obulaga bye mwazuula mu kunoonyereza okwo.*

Oba

- b. Bavubuka bano ennaku zino beegugumbulidde enkola y’okugenda mu nsi z’Abawalabu olw’ensonga ez’enjawulo. Lwabadde olwo nga muli ku gimu ku mikutu migatta bantu n’ofuna omukisa ogunyumyako n’abamu, era ne bakubuulira ensonga ezibatwalayo nga n’oluusi abamu babonaabonerayo.

*Wandiikira omubaka w’ekitundu kyammwe mu Ssetteeserezo (Palamenti) ng’omunyonnyola ensonga eziviiriddeko abantu b’ekitundu okugenda ebweru, era kiki ekiyinza okukolebwa okusobola okukendeeza ku muwendo ogugendayo okusobola okumalawo okubonaabona kwabwe.*

## **EKITUNDU B**

2. Abatuuze ku kyalo gy’obeera baafuna omukisa ogusomesebwa ku Kawuka ka mukenenya era ne bafuna obupapula obwaliko obubaka mu Lungereza. Eky’ennaku bangi tebaategeera bubaka obwo.

*Yamba abatuuze ku kyalo ky’ewammwe ng’oKyusa ekitundu kino okizze mu Luganda.*

Aids is the most serious health problem in uganda today with reported cases doubling every 12 months. It is the leading causes of adult deaths and the sixth among children under five. The number of AIDS cases orphans and children with H.I.V, is increasing rapidly. Repored AIDS cause in girls aged 15 – 19 out number by six times cases in boys of the same age.

There is hope however, most ugandans knows how to AIDS is spread and the options they have to protect themselves. Although the behaviors changes that should accompany this knowledge are not very evident, some change is taking place. The challenge now is to help ugandans translate their knowledge of AIDS into sexual behavioural change that will protect them from H.I.V.

Says Dr Sarah Nsereko a nutritionist at Mulago Hospital

Quantity of Breast milk increases the more breast feed, the hormone which stimulate milk production reduces and so breast milk. Breast milk helps in the development of internal organis such as lungs, brain, heart etc.
