

## Item

Masaka district local government has planned to create jobs for jobless youth by setting up industry that makes kitchen utensils. However they do not know the various materials and their properties that can be used to make the items. The district has contacted the chemistry department of your school to advise them on what elements to be used as raw materials.

## Task;

As a chemistry student who has learned about periodic table, write a presentation you would give upon invitation being selected by the head of department.

- a) On the category of elements/substances.
- b) Suitability of the element.
- c) Impact of the element on the environment and mitigation.
