P530/3 BIOLOGY Paper 3 (Practical) Nov./Dec. 2024 31/4 hours

UGANDA NATIONAL EXAMINATIONS BOARD

Uganda Advanced Certificate of Education

BIOLOGY

Paper 3 (Practical)

3 hours 15 minutes

INSTRUCTIONS TO CANDIDATES:

This paper consists of three questions.

All questions are compulsory.

Write the answers in the spaces provided. No additional sheets of paper should be inserted in this booklet.

You are **not** allowed to start working within the first **15** minutes. You are advised to use this time to **read** through the paper and ensure that you have all the apparatus, chemicals and specimens you require.

1.	You are provided w (a) Examine the l location of the	with specimen X which is freshly killed head of specimen X and describe the e following:	d. structure and
		ae (whiskers).	(03 marks)

			1,111
	(ii) Eyes.		
	(iii) Pinnae.		(03 marks)
			in the life of
(b)	How significant is the specimen X?	he location of the following structure	
	(i) Vibrissae.		(02 marks)
	***************************************	***************************************	

(ii) Eyes.	(1½ marks)

(c) Dissect the abdominal cavity of specimen X to expose the structures in the viscera. Displace the liver lobes anteriorly to expose the underlying structures without displacing the stomach. Cut the rectum at the base, pull it upwards and pin it to the right side of the specimen. Locate the duodenum, caecum and ileum. Displace the duodenum and caecum to the right side of the specimen and the ileum to the left side of the specimen. Draw and label the displayed structures of the alimentary canal of the abdominal cavity up to the pinned rectum including the mesenteric structures attached to the small intestine.

(17 marks)

(d) With the stomach displaced to the right side of the specimen, draw and label the organs lying between the anteriorly displaced liver lobes supply the structures displayed.

(12 marks)

- You are provided with seedlings/seeds of five different lots labelled A, B, C, D and E, which have been grown for different lengths of time. You are required to investigate the effect of growth activities on the chemical components of the seed/seedlings using the following procedures:
 - (a) (i) Label 5 petri dishes A, B, C, D and E.
 - (ii) Obtain 10 seedlings/seeds from each lot and place them in the respective petri dishes labelled A, B, C, D and E.

- (iii) Using a clean mortar and pestle, thoroughly pound the seedlings from petri dish A. Add 15 cm³ of distilled water, stir well and decant into a clean boiling tube and label it extract A₁. Pour the residue into the plastic mug / beaker provided.
- (iv) Repeat the procedures (a)(i) (iii) using the remaining seed/seedling lots to make corresponding extracts B_1 , C_1 , D_1 and E_1 .
- (b) (i) Carry out tests in table 1 to determine the food nutrients in extracts C₁ and D₁. Record your test procedures, observations and deductions in the table.
