P525/1 CHEMISTRY Paper 1 (Theory) Nov./Dec. 2023 2³/₄ hours

UGANDA NATIONAL EXAMINATIONS BOARD

Uganda Advanced Certificate of Education

CHEMISTRY

Paper 1 (Theory)

2 hours 45 minutes

INSTRUCTIONS TO CANDIDATES:

Answer all questions in section A and six questions in section B.

All questions must be answered in the spaces provided.

The Periodic Table, with relative atomic masses, is attached at the end of the paper.

Mathematical tables (3-figure tables) are adequate or non-programmable scientific electronic calculators may be used.

Illustrate your answers with equation(s) where applicable.

Where necessary, use the following:

Molar gas constant, $R = 8.31 \text{ JK}^{-1} \text{ mol}^{-1}$.

Molar volume of gas at s.t.p is 22.4 litres.

Standard temperature = 273 K.

Standard pressure = 101325 Nm^{-2} .

SECTION A (46 MARKS)

Answer all questions in this section.

(a) Kinetic data for the decomposition of nitrogen(V) oxide is shown in table 1.

$\frac{\text{able 1}}{[N_2 O_5] \text{ (mol dm}^{-3})}$	Initial Rate (mol dm ⁻³ s ⁻¹)
0.0016	0.12
0.0024	0.18
0.0032	x

Calculate the;

	(i)	order of the reaction.		(1½ marks)
	·······	9 °		
•••••				
6	(ii)	rate constant for the	reaction.	(1½ marks)
	(iii)	value of \boldsymbol{x} .		(01 mark)
 (b)				ermine orders of reactions.
				(01 mark)
		•••••	• • • • • • • • • • • • • • • • • • • •	

	from alkyl benzene.	(02
 (b)	State;	
3/1	(i) one advantage of soap	oless detergent over soapy detergen
	(ii) one disadvantage of so	oapless detergent over soapy deter
 (a)	A compound O consists of 9	94.11% sulphur, the rest being hyd
(a)		
	Calculate the empirical form	
		ula of Q . (0.
(b)	When 0.15 g of Q was vapou	urised at 293 K, the vapour produc
	When 0.15 g of Q was vapou	
	When 0.15 g of Q was vapou occupied 106 cm ³ at 101325	urised at 293 K, the vapour production $^{-2}$. Determine the molecular for $^{-2}$.
