Subsidiary ICT (PRACTICAL)   Paper 2 UNEB 2013 Qn 4

In a learner centered approach, a teacher uses some learners to pass on knowledge to their fellow learners. It makes learning fun as learners get to learn from one another. Senior six (S.6) learners can pass on knowledge to senior two (S.2) learners and vice versa.

Study the information and perform the tasks below.

Categories of Computer Devices

Computer devices are sub divided into four categories as follows:

- Input devices
- Output devices
- Processing devices
- Storage devices

Input devices:-These are any hardware components used to enter data and instructions into a computer system. E.g .Keyboard

Output devices:- These are any hardware components used to display or convey information or data to a user. E.g monitor

Processing devices:- This is used to manipulate data into information. Processing is usually done in the Central Processing Unit (CPU).

Storage devices:- These are used to record and retrieve data to and from a storage medium in the computer system. They can be either internal like the HDD, or external like a CD. Storage devices have got their specialized drives through which data can be written or read. For example, data on a CD can be read with the help of a CD or DVD drive.

Conclusion:

Whereas the above devices are standard input-output devices, some other devices are referred to as computer peripherals. **Computer peripherals** are any electronic devices that can be hooked to a computer. Examples of peripherals include speakers, microphone, printers, scanners and digital cameras.

Tasks

(a) As a senior six Subsidiary ICT student prepare a four slide presentation for the S.2 learners summarizing the information given above.   *(08 marks)*

(b) Save the presentation with your name.   *(01 mark)*

(c) Insert a header as your name and personal number.   *(01 mark)*

(d) Change the background of all slide titles to an appropriate style.   *(01 mark)*

(e) Set the slide transition of your choice, with transition time of 6 seconds. *(02 marks)*

(f) Set animations of your choice for all slide titles and other parts of the slides. *(01 mark)*

(g) Make use of speaker's notes and relevant graphics. *(02 marks)*

(h) Insert a summary tabular slide between the last slide and second last slide with the following data.

(03 marks)

Summary table:

NO	DEVICE	HARDWARE CATEGORY
1	Keyboard &Mouse	Standard Input device
2	Monitor	Output device
3	CPU	Processing device
4	Hard Disk	Storage
5	Speakers, Microphones, printers, scanners, and digital cameras	Peripherals

(i) Save and print your work. *(01 mark)*
